Sonos ZP90 Zoneplayer

£274.85

The Sonos ZonePlayer 90 lets you play all the music you want, all over your house, on all the audio equipment you already own – your home cinema receiver, stereo system, powered speakers, and more. Just connect the ZP90 to any amplified audio device in any room and it’s instantly part of the wireless Sonos system. The ZP90’s digital and analogue outputs deliver superior sound to every room. And with the ZP90’s superior wireless range, no room is out of reach. The ZP90 is super small, so it will fit just about anywhere. Plus, every ZP90 includes a Sonos Desktop Controller for the ultimate in control and convenience.

Connects to all your favourite audio equipment Simply connect the ZP90 to the audio equipment you already own – your home cinema receiver, stereo system, powered speakers, and more – and enjoy the music. The digital and analogue outputs, connected to your favourite sound system, deliver superior sound to every room. And when it comes to volume control, you’ve got a choice: via Sonos or directly on your favourite audio equipment.

Best-in-class wireless technology for multi-room music The ZP90 brings great-sounding music wirelessly to any room in your house, without a big wiring project. SonosNet 2.0, our latest wireless mesh network technology, provides double the wireless range for whole-house coverage, ensures synchronous music playback, and avoids sources of wireless interference. Which means the music gets to all the right rooms – near or far – at exactly the right time.

Instant access to endless music Sonos liberates the music on your computer and the Internet so you can play it all, all over the house. Wherever there's a ZP90 (or any other ZonePlayer), you can listen to your personal collection of music stored on your computer, plus thousands of free Internet radio stations. And Sonos works seamlessly with the most popular music services so you can stream millions of songs and stations from the Internet to the rooms of your choice. You can even connect the ZP90 to your favourite audio source such as an iPod or CD player and listen on all the ZonePlayers throughout your house.

Simple setup Setting up your ZP90 is incredibly easy. No technical or wiring expertise required. And no need to break through walls or re-wire your entire house. All you need is a high-speed Internet connection and a router to get started. One ZonePlayer or ZoneBridge in your system must be connected to the router and all the rest will work wirelessly. Add more ZonePlayers in more rooms without adding wires.

New features and music services with automatic updates Unlike most other consumer electronic products, the ZP90 and the entire Sonos system keep getting better even after you buy it. With free automatic software updates, you'll always have the newest features and music services to enjoy. Just register your system and Sonos will automatically notify you when software updates are available. Simply press one button and your system updates itself.
